

FOR IMMEDIATE RELEASE

Comark Corporation announces MDU PC Military and Commercial Marine Panel Mount Computers

Medfield, MA. February 20, 2009 – Comark Corporation, a leader in the design and manufacture of ruggedized custom computer solutions for the marine and military markets expanded its portfolio of display and computer solutions by announcing the availability of the MDU PC Panel Mount Computer Series.

The MDU PC Series combines the functionality of a computer, display and optional touchscreen into a modular assembly. The MDUPC-15, MDUPC-19 and MDUPC-20 (15", 19" and 20" displays respectively) are designed for military and rugged commercial marine markets. The computer features a range of processing from Celeron M to Core 2 Duo Mobile, up to 4GB RAM and compact flash up to 32GB and beyond. The LCD features full dimming capability, with sunlight readable and LED backlit options. These displays can all be configured to full military specifications, including MIL-STD-810F, MIL-STD-461E, MIL-STD-167, or for commercial applications, EN-60945, with ABS type approval expected in the spring of 2009. All electronics are conformal-coated to protect against corrosion. The MDU PC is perfect for ECDIS Navigation, machinery control and other HMI flat-panel applications.

"Utilizing the latest display and processing technology, the MDU PC is a complete marine panel mounted system which can be integrated into long-life programs, with Comark's guarantee of extended product availability and support," *said Bob Tranfaglia, Director of Sales for Military, Marine, and Mobile Automation.*

About Comark Corporation

Comark Corporation is a designer and manufacturer of high-performance, ruggedized computer solutions for military, mobile, building automation, kiosk, digital signage and industrial automation market segments. The Company is driven by innovation and over 30 years of expertise in designing custom, high-performance computers and displays. Seamless integration with state-of-the-art software and network applications deliver dynamic solutions engineered for customer-specific requirements.
